BRAHIM ait-mlouk

Consultant | Python Backend | AI Engineer

Rabat, Morocco +212767999750
brahim.engineer.it@gmail.com brahim
brahimengineerit-ux Portfolio

Python Developer transitioning into AI Engineering, with 3+ years of backend and automation experience at Stellantis (automotive). Skilled in Tools Engineering, Python tooling, and data workflows; actively building LLM-powered projects with RAG pipelines, OpenAI/Claude integration, vector databases, and multi-agent architectures.

Work Experience

01/2025 – Present
AI Engineer (Consultant)
Alten Maroc → Stellantis | Rabat, Morocco (Hybrid)

- Designed and built RAG pipelines end-to-end: document chunking, embedding generation, vector indexing (FAISS/Chroma), retrieval APIs, and LLM-based answer synthesis
- Integrated OpenAI and Claude APIs into enterprise workflows for document understanding, information extraction from PDF/XML, and structured JSON generation
- Engineered production prompt templates and evaluation loops to improve factual accuracy, reduce hallucinations, and enforce structured outputs for automotive engineering use cases
- Built FastAPI services exposing LLM-powered endpoints with authentication, rate limiting, streaming responses, and monitoring
- Deployed AI workloads on AWS with secure key distribution (hybrid RSA-2048 + AES-256-GCM over TLS) and cost-aware infrastructure

09/2023 – 12/2024
Python Developer / Tools Engineer & Consultant
Alten Maroc → Stellantis | Rabat, Morocco (Hybrid)

- Built 15+ tools supporting engineering workflows, file and document processing, and system integrations
- Developed reusable internal Python libraries and deployed them to Artifactory for team-wide usage
- Implemented end-to-end data workflows: data ingestion from APIs, Excel, CSV, and system outputs, followed by validation, processing, and structured output generation
- Implemented data quality checks ensuring accuracy, consistency, and reliability of outputs
- Automated repetitive engineering tasks, reducing manual processing time and improving team productivity
- Integrated REST APIs and internal services to synchronize data across heterogeneous systems (XML, JSON, CSV, Excel)
- Delivered features under CI/CD pipelines using Git and TeamCity, ensuring reliable and reproducible deployments
- Collaborated with French and Brazilian teams in Agile (Scrum) environments across multiple time zones.

07/2022 – 07/2023
Junior Python / Full-Stack Developer
Conexcap Technology | Marrakech, Morocco (Remote)

- Developed backend data flows, SQL queries, and REST endpoints for a production FinTech platform
- Diagnosed and resolved production issues through log analysis and database debugging
- Implemented data validation, automated tests, and bug fixes across backend and frontend

Education

2020 – 2022 **Master's Degree in Information Systems Engineering**
Cadi Ayyad University, Marrakech, Morocco

2016 – 2020 **Bachelor's Degree in Software Engineering**
Moulay Ismail University, Errachidia, Morocco

2016 **High School Diploma – Mathematics**
Sidi Ahmed Benaceur High School, Zagora, Morocco

Skills

AI / LLM	OpenAI API, Claude API, Prompt Engineering, RAG, LangChain, LangGraph, Embeddings, FAISS, pgvector, Multi-Agent Systems, Structured Outputs, LLM Evaluation, MCP
Backend & Data	Python, FastAPI, Flask, Django, REST APIs, Async, Celery, Redis, SQL, PostgreSQL, Elasticsearch (ES|QL), ETL, CSV/JSON/XML, PyMuPDF
DevOps & Cloud	Docker, Git, TeamCity (CI/CD), Bash, Linux, AWS (EC2, S3, Lambda, IAM, systemd, gunicorn); mTLS/TLS, RSA-2048, AES-256-GCM, PKI
Currently Learning	Fine-tuning, LLM Observability (Langfuse, Ragas), LlamaIndex, vLLM, Model Context Protocol

Languages

Languages • Arabic (Native) • English (Fluent) • French (Professional) • German (A2, targeting B2)
